DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

Paragraph [0001] should be updated to reflect the patent status of application

10/294,010.

Appropriate correction is required.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. **Claims 1-27** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 and 14 of U.S. Patent No. 6,662,495.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the floral containers cited in the instant independent claims 1,7,14 and 21 are encompassed by the floral containers of conflicting '495 independent claims 1,7 and 14.

Specifically, the containers of conflicting '495 independent claims 1,7 and 14 are cited as having "an inwardly folded portion comprising an expansion element in the closed lower end" and an "upper end having a curved upper edge", while the containers of the instant independent claims 1,7 and 14 are cited as having "an expansion element in the closed lower end", and an "upper end having a curved upper peripheral edge" and instant independent claim-21 cites "an inwardly folded portion in the closed lower end" and "an upper peripheral edge".

Furthermore, the method steps cited in the instant independent claims 7 and 14 are recited in the conflicting '495 independent claims 7 and 14.

Regarding the instant dependent claims:

Instant repeating dependent claims 2,8,15 and 22 are identical to conflicting '495 dependent claim-2.

Art Unit: 3644

Instant repeating dependent claims 3,9,16 and 23 are identical to conflicting '495 dependent claim-3.

Instant repeating dependent claims 4,10,17 and 24 are identical to conflicting '495 dependent claim-4.

Instant repeating dependent claims 5,11,18 and 25 are identical to conflicting '495 dependent claim-5.

Instant repeating dependent claims 6,12,19 and 26 are identical to conflicting '495 dependent claim-6.

Instant repeating dependent claims 13 and 20 are identical to conflicting '495 dependent claim-13.

Instant dependent claim-27 cites a curved upper peripheral edge, which is encompassed by the "curved upper edge" as cited in the conflicting '495 independent claims.
